

# What's for Lunch? Biodegradable Trays!

**School Lunches just got a lot more environmentally friendly at OCEAA, thanks to Girl Scout Troop 3126 and supportive OCEAA families like you!**

Many of you gave small donations at the beginning of the school year to enable our school to replace Styrofoam trays with biodegradable trays. This change will enable our school to keep over 118,300 Styrofoam trays from entering our already over-crowded Orange County landfills.

To date, we have been able to raise a little over \$1,000 to begin the implementation of this change. However, we still need \$3,500 more to be able to continue using these trays for the remainder of the school year. There is still time to make a contribution. If you would like to give towards this project, please complete the bottom portion of this flyer, and return it with cash or check to the front office.

**Thank you for your support today in playing a part to help make our world a better place!!**

(Please return this bottom portion to the front office with our donation of cash or check made out to OCEAA with "tray project" in the memo line)
